

# **Working Program**

## **Tur-adrion project**

**Dear fellows,**

**This is a first draft of a working programme for the activity you are expected to conduct for the “tur-adrion project”, in the context of the Uniadrion virtual university.**

**First of all, after the confirmation of their appointment have to get in touch with Prof. Giorgio Praderio, who is the project coordinator in order to communicate their working coordinates (e-mails, address, etc.).**

**Fellows are expected to start their work at the end of August and within one year time will pursue the following tasks:**

**1) Get acquainted with the Uniadrion structure, visiting the website ([www.uniadrion.unibo.it](http://www.uniadrion.unibo.it)) and contacting the executive secretariat (immediately after the appointment).**

**2) Study data provided by the teachers**

**3) Produce two working papers on the two selected topics, which are “The Adriatic Multi-city of Hospitality” and “Tourism in the Islands of Adrion”**

**Fellows will be divided in working groups after the three area districts Upper, Middle and Lower Adriatic (the last one including the Ionian area), which the council of teachers have decided to be the working structure.**

**Each fellow will work independently and will refer to Prof. Praderio and to the pertinent teachers for its area of interest. The assignment of fellows to their area district will be made by the council of teachers but suggestions coming from fellows will be considered at this regard. Then, for each of the two topics, every fellow will decide a specific theme for a project to develop (i.e Sea routes in middle Adriatic islands, or a case study of excellence in urban tourism) in order to produce a final report (15-20 pages). Teachers will be constantly in touch fellows during the working period for both monitoring the work and reply to answers and suggestions coming from them.**

**Two frontal meetings are actually planned: the first in Bologna (3-7 november) and the second in May, in a place to be defined (possibly the island of Vis, Croatia). The rest of the time will be dedicated to on-line work and research activity. There will be periodical exchange of information and on-line communication following a weekly schedule: more information on this point will be delivered as soon as possible.**

**The following plan is a first attempt to schedule the work to come in the next year:**
